

Ludovic Rivallain

Senior Virtualization engineer @Group SII

Experience

July 2016 – now

SII Group, Rennes, France

Cloud Computing and VMware Senior Consultant

Attached to the *Infrastructure Experts* entity, I guide our customers in the *think and build* operations related to cloud computing solutions. I especially contribute to the realization of *Cloud Providers* platforms and I am in charge of the automation for final customers-facing solutions.

- **Automation engineer**
 - Kubernetes deployments: Rancher, K3S, Tanzu Kubernetes Grid
 - Function-as-a-service (FaaS) solutions: OpenFaaS, Argo, AWS Lambda
 - VMware vRealize Orchestrator
 - Ansible, Terraform
 - CI/CD: GitHub Actions, GitLab CI, Travis, VMware code Stream
- **Engineering and level 3 support**
 - vRA: vRealize Automation + XaaS
 - vRO: Realize Orchestrator
 - vCPP: VMware Cloud Provider Program & vCloud Usage Meter
 - vCSA: vCenter Appliance
 - NSX-V/NSX-T: Network Virtualization and Security
 - vCD: vCloud Director
 - ✦ UI/API Extensions building
 - ✦ Container Service Extension (CSE)
- **Cloud Computing Consultant**
 - Technical solutions engineer
 - Working closely with sales, customers, development teams
 - Support for “On Premise Cloud” migration
 - Providing best practices for Cloud usage
 - Systems architect
- **Trainer (for both internal and external public):**
 - Cloud Computing generic training sessions
 - Junior VMware training sessions
 - Public Cloud approach sessions
 - OpenStack user and administrator sessions

Example of projects:

- **Think and build of multiple automation solutions for a Cloud Provider company**
 - Design and development of complex automation solutions to provide:
 - ✦ additional customer self-service solutions (quota management, security services...)
 - ✦ backend systems automation (automated backup policies, observability...)
 - Design of a new automation stack (K8s, OpenFaaS, Argo workflows)
- **Think/Build/Run of a Storage-as-a-service extension for VMware vCloud Director**
 - Backend: vCD API extension: Multi-threaded Python service for automation orchestration
 - Frontend: vCD UI extension: Angular-based UI published to tenant for self-service storage management.
 - Continuous-Integration pipelines based on *Gitlab CI*, *Swagger* documentation of the REST API. Some vRO-based automation for network provisioning.
- **UI for Container Service Extension for VMware vCloud Director**
 - Frontend: vCD UI extension: Angular-based UI published to tenants for self-service Kubernetes cluster management.
 - Continuous-Integration pipelines based on *Gitlab CI*, *Reverse engineering* of CSE API backend and CLI client.

📍 Bordeaux, France • 🏠 ludovic.rivallain.fr

☎ +33 6 64 24 04 13 • ✉ ludovic.rivallain@gmail.com

- **Hybridation of vRealize Automation with a new public cloud provider**
 - Integration of a non-natively supported public cloud provider within vRA UI
 - vRealize Orchestrator *Dynamic Types*, API integration, OpenStack Heat helpers.
 - **XaaS development for vCloud Director and vRealize Automation**
 - Multiple kind of automation services provided to end-users through vCD or vRA UI or API: storage, network, backup, migration, quota management...
 - vRealize Orchestrator, API or AMQP integrations, NSX, multiple NAS and backup solutions...
-

Nov 2014 – July 2016 **OVH, Rennes, France**

Tech-leader private-cloud operations

Creation and managing of operations teams for OVH cloud offers.

- 12 peoples between Rennes, Tunis, Montreal, Roubaix
- 3 products : (3000) Dedicated Cloud, (80 000) Virtual Private Server, Desk as a Service
- 24/7 service with planning management
- Virtualization *tech-leader* role
- **Dedicated Cloud:**
 - 3000 VMware vCenter / 10 000 Hosts ESXi
 - Home made monitoring (redis & scripting)
 - Automation (delivery, failure reactions) : Perl, Powershell, Bash
- **Virtual Private Server:**
 - 80 000 VPS (VMware, Openstack, OpenVZ)
 - Shinken-based monitoring
 - Massive migrations, capacity planning
 - Desk as a Service:
- **Desk as a Service:**
 - Launch of the commercial offer based on VMware Horizon View
 - Shinken-based monitoring (NRPE) + OpenTSDB Timeseries

Jan 2011 – Nov 2014 **SII Group, Rennes, France**

VMware junior consultant

VMware trainer for internal employees and customers. Think & build & support to run, of Orange Business France Cloud Computing offers.

- **Think:**
 - Data recovery plans (VMware SRM, Zerto)
 - International cloud computing offers design
- **Build:**
 - Orchestrations tools (VMware Orchestrator, VMware vCloud director)
 - Best practices definition
- **Support to run**
 - Level 3 support: analysis, editor's cases management
 - Incident management
 - Massive migrations and functional changes studies

Jan 2007 – Dec 2010 **SII Group, Rennes, France**

Web qualification engineer

Technical and functional validations of several web-based products

Apr 2006 – Dec 2006 **One Access Network, Paris, France**

Protocol qualification engineer

Network protocol validation of multi-protocols routers. Pre-sales consulting and documentation of automated platforms for validation.

Education & Recognition

Since 2018	vExpert program 3 years recognition in <i>VMware vExpert</i> community program + <i>vExpert for Cloud Provider</i> in 2020. vExpert profile 1741.	VMware community
2005 – 2006	Bachelor degree, Voice over IP and systems administration	IUT Lannion
2003 – 2005	Undergraduate degree, Telecom and networks 2 years university degree	IUT Lannion

Trainings & Exams

2020	VMware vSphere: Optimize & Scale [V7] VMware Certified Professional - Data Center Virtualization 2020
2020	Amazon Web Services Architecture
2019	VMware NSX-T: Install Configure & Manage
2019	VMware vSphere: Optimize & Scale [V6.7]
2017	OpenStack administrator
2017	VMware vCloud Director: Install, Configure, Manage [V8.20] (Custom)
2017	VMware vRealize Automation: Install, Configure, Manage [v7.2]
2016	VMware vCloud Director: Install, Configure, Manage [V8.10] (Custom)
2012	VMware vSphere: Install, Configure, Manage VMware Certified Professional 5 - Data Center Virtualization

Skills

Modern applications

- Kubernetes
 - Rancher, K3S, Tanzu Kubernetes Grid
 - Kubectl, Helm, Cluster API
 - Service Mesh: Istio, Linkerd
- Middlewares
 - OpenFaaS, AWS Lambda
 - Prometheus, Grafana
 - Argo Workflows
 - Traefik, HAProxy
- Observability and event-driven infrastructures

Virtualization

- VMware
 - vSphere ESXi, vCenter, vCSA & Operations management
 - NSX-v, NSX-T
 - vCloud Director + Extensions of both API and UI
 - vRealize Automation
 - vRealize Orchestrator
 - vRealize Lifecycle Manager
 - VCPP licensings - vCloud Usage Meter
 - VMware Site Recovery Manager
- Openstack (Nova, Neutron, Keystone, Cinder, Swift, Glance, Horizon...)
- OpenVZ
- Docker & Linux LXC
- Linux KVM and XEN

Self interests

Owner and main author of vuptime.io blog: focused on virtualization & IT automation.

Speaker and active member of French *VMUG* (VMware User Group).

Other interests:

- Rock climbing
- Canoe-kayak
- Music festivals
- Open-source: Ansible, Kubernetes and K8S related projects

Programming

- Bash & Python addict
- Powershell enthusiast
- Perl, TCL/Expect, Web (HTML, JS, CSS)
- Git

Systems

- Windows Server (SQL server, Active Directory, KMS, WSUS)
- Linux (Apache, Nginx, MySQL, PostgreSQL...)
- MacOS X

Networking

- TCP/IP
- Routing
- Firewalling
- Load-balancing

Hardware

- HPE blades
- Dell
- Cisco
- Supermicro

Methodology

- Scrum / Agile
- DevOps:
 - Ansible, Puppet, Terraform
 - Shinken
 - REST API programming
